O'Brian Griffith

--

Saint Michael, Barbados

Summary

I'm an early-career technology professional with a background in computer science, cybersecurity, IT support, data analysis, and artificial intelligence. I am CompTIA Security+ certified and have hands-on experience supporting AI and data-driven projects, cleaning and preprocessing data, assisting with server support, troubleshooting hardware, and contributing to software-related projects. My experience includes contract work as an AI Analyst with Protexxa, internships with the Ministry of Innovation, Science and Technology and the Ministry of Education Barbados, and technical projects involving data cleaning, software development, and database-related work. I am currently seeking opportunities in cybersecurity, IT support, SOC analysis, data analysis, and junior technology roles where I can apply my technical foundation, continue learning, and contribute to real-world technical solutions.

Experience

Protexxa

AI Analyst | Data Cleaning & Cybersecurity Data Support
September 2024 - September 2025 (1 year 1 month)

Barbados

Worked as an AI Analyst supporting AI and cybersecurity-related data projects, with a focus on data cleaning, preprocessing, data quality, and structured dataset preparation.

Key responsibilities and contributions:

- Cleaned, organized, and prepared large datasets for analysis and cybersecurity-related workflows.
- Supported data engineering tasks, including data preprocessing, formatting, validation, and transformation.
- Helped improve dataset quality by identifying inaccurate, incomplete, duplicate, invalid, or inconsistent records.
- Worked with cybersecurity-related data to support safer, more reliable, and more useful datasets for analysis.

- Used technical problem-solving skills to support AI, data, and automation-related project work.
- Gained practical experience working with data quality, structured information, and technical project requirements in a professional environment.

Skills used: Data Cleaning, Data Preprocessing, Data Analysis, Data Engineering Fundamentals, Cybersecurity, Artificial Intelligence, Python, SQL, Problem Solving

Ministry of Education and Human Resource Development, Barbados IT Intern | Server Support & Technical Support

March 2025 - August 2025 (6 months)

Elsie Payne Complex, Constitution Road, St. Michael, Barbados, W.I.

Supported the Management Information Systems / IT department with technical support, server-related tasks, hardware troubleshooting, and software-related project work in a government education environment.

Key responsibilities and contributions:

- Assisted with server support and day-to-day system maintenance to help keep internal technology services running reliably.
- Provided technical support for computers, printers, and other IT equipment used by staff.
- Helped troubleshoot hardware and software issues, including basic computer maintenance and setup tasks.
- Contributed to the development of a program used to process Common Entrance Exam student results and assist with school placement based on performance.
- Supported IT operations in a professional government environment, gaining hands-on experience with infrastructure, user support, and education technology systems.
- Developed practical experience in troubleshooting, technical communication, system support, and software-related problem solving.

Ministry of Innovation, Science and Technology (M.I.S.T) Technology Intern | IT & Digital Systems Support

July 2024 - November 2024 (5 months)

Highway 2, Saint Michael Barbados

Completed a technology internship as part of the Barbados Community College associate degree program, gaining exposure to IT operations, digital systems, project work, and professional technology environments.

Key responsibilities and contributions:

- Supported assigned technology-related tasks across IT, digital systems, and administrative technology environments.
- Gained exposure to professional IT operations, technical support processes, and workplace technology standards.
- Assisted with digital systems and technology-focused work while learning how government technology departments support internal users and public-sector operations.
- Developed practical experience in communication, teamwork, troubleshooting, documentation, and professional problem-solving.
- Strengthened understanding of how IT, digital transformation, cybersecurity, infrastructure, and project execution connect in a real working environment.
- Completed the internship as part of the Barbados Community College Computer Science associate degree program.

Education

Barbados Community College

Associate's degree , Computer Science · (September 2021 - July 2024)

Queen's College Barbados

· (September 2017 - July 2021)
